

# Problem Interview Canvas

 <b>Job to be done</b> <i>Describe what the target group wants to get done. What is the purpose of the action?</i>	<b>1 Trigger</b> <i>What was the trigger to get started with the job to be done?</i>	<b>2 Barriere</b> <i>What are the barriers that could have led (or led to) not getting started with the job to be done at all?</i>	<b>3 Frequency</b> <i>How often does it occur? How often does the job need to get done?</i>	<b>4 Alternatives</b> <i>What possible solutions have been considered or tried to get the job done?</i>
	<b>5 Existing solution</b> <i>Which solution is now being used to get the job done?</i>	<b>6 Search</b> <i>How did the target group find this existing solution?</i>	<b>7 Argumentation</b> <i>Why did the customer choose this existing solution?</i>	<b>8 Involvement</b> <i>Who are involved with the existing solution/-job to be done? Think of a decision maker, user, executor and more.</i>
 <b>Customer Segment</b> <i>Who is your customer? If necessary, differentiate between the decision maker, payer, user and influencer.</i>	<b>9 Pains</b> <i>What are the disadvantages of the existing solution?</i>	<b>10 Gains</b> <i>What are the benefits of the existing solution?</i>	<b>11 Cost</b> <i>What does the existing solution cost?</i>	<b>12 Time</b> <i>How much time does the existing solution cost for everyone involved?</i>

*Answer this question before the interview, it helps you determine who to interview.*

*Answer this question before the interview, it helps you determine who to interview.*

**How to use:** Use this canvas when interviewing your customer segment. Learn more about their lives, problems and challenges. You validate your assumptions.
